

Responsible Conduct of Research

MED 255

This course is designed to engage participants in productive discussions about ethical issues commonly encountered during their research careers and addresses contemporary debates at the interface of biomedical science and society. This course is required for graduate students and postdoctoral scholars who are supported by grants from the NIH, and many departments and programs also require it as part of their curricula. Research experience is recommended. Go to <http://bioethics.stanford.edu> for more information.

Spring 2008 Schedule:

Intensive Format Sections:

- Section 1 April 5, Saturday, 9:00 – 6:00, MSOBx303
- Section 2 April 26, Saturday, 9:00 – 6:00, MSOBx303
- Section 3 May 17, Saturday, 9:00 – 6:00, MSOBx303

Readings and study guide for the entire course must be completed prior to intensive classes. Attendance for the entire day is required.

Registration:

Medical students and graduate students should register for MED 255 using Axxess. Others, such as postdoctoral fellows, medical fellows, or faculty should e-mail pbailey@stanford.edu to register.
