

Mentoring in Research 2-Day Workshop for Postdoctoral Scholars

Want to improve your mentoring and managing skills? Want to work more effectively with undergraduates, graduate students, and research assistants? Want to develop your mentoring skills in order to prepare for the academic job market? Come to this 2-day workshop!

Who: Postdoctoral Scholars who work or anticipate to work with undergraduate and graduate students and who would like to assess their competencies and build their skills as mentors.

Dates: Friday, July 22 and 29, 2011

Time: 9:00 AM – 12:30 PM

Location: Clark Center, S362

Description: This 2-day workshop provides hands-on training to improve the mentoring skills of participants. We will shed light on your mentoring style, and provide feedback for how to interact with mentees and mentors of differing styles. This interactive workshop uses case studies, scenarios, and small groups to explore a variety of situations and to illustrate the challenges and rewards of mentoring in research.

Goals: Participants will:

- explore one's own learning and teaching style and how it impacts mentoring
- improve your skills as a mentor and project manager
- learn from case studies common issues, challenges around mentoring, in a open discussion with peers and faculty mentors

Instructors: *Sofie R Kleppner, PhD*, is the Academic and Research Program Officer for the Stanford Cardiovascular Institute. She received her PhD in Neuroscience from the University of Pennsylvania, and completed her postdoctoral fellowship at the Brain Research Institute, UCLA. Her experience in academia and biotech led to a deep interest in the role of mentoring, and the traits of effective mentors.

Emily A. Lilo, MPH, is Program Manager with CHP/PCOR. Prior to coming to Stanford, she worked at the Harvard Medical School running early childhood obesity prevention interventions. Her experience leading and managing students and teams led to her commitment to assist a new generation of medical scholars to become good mentors.
